The amendment received 15 May 2006 has been made of record. Claims 1-7 and 14-17 are pending.

The rejections under 35 USC 112 are withdrawn in view of applicant's amendments and arguments.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 14, 15 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Lucas.

Lucas discloses compositions and methods for sealing punctures in pneumatic tires. The compositions comprise molasses and fibrous materials and are taught as injected through the valve stem of the tire. This injection process uses a syringe which is seen as meeting the instant limitations to a pressurized container and is seen as spraying the liquid substance into the tire.

Claim 16 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-7 are allowed.
